IRIS

We guarantee all stock listed to be true to name and to arrive at destination in good condition. We will cheerfully replace any that prove otherwise.

Believing that the IRIS can do its best only when transplanted in the summer, we will take orders for shipment at that time only.

Our stocks are limited in many instances and orders are accepted subject to stock being unsold. Orders will be filled with plants grown one year after division until the supply is exhausted after which strong single fan divisions will be furnished, if desired.

We invite correspondence on varieties marked "not yet for sale" as in some instances a few divisions may be spared.

Terms—cash with order. Shipping charges will be prepaid.
